

Language

...is more than a simple component of culture. It encompasses and incorporates the entire spectrum of culture, which is why it is so important for children to have the ability to know their "own" language as a connection to their ancestry, and to a sense of self identity.

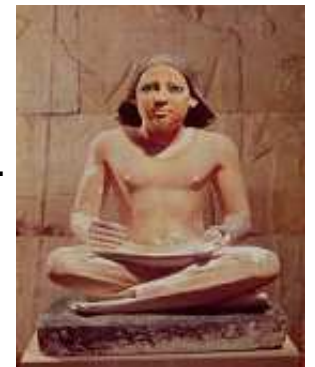

When we communicate in the language of our ancestors, through the *use* of that language we energetically resonate with and cohesively bond to the identical vibration wave-forms of our ancestors, as well as with each other.

In the daily practice of Kemetic cognition (that is, to communicate and comprehend in the ancient mind-set of our ancestral Masters) ancestral memory is awakened, and re-introduced to our physical and psychological senses. This is why it became of paramount import to those who structured the slave paradigm in the West to *erase* that memory from enslaved Kemetic descendents in the Diaspora, in order to psycho-genetically disconnect us from our archetypal selves.

As in other languages, Mdu Ntr requires the use of our eyes, ears, tongue, throat and brain; but unlike most other languages – with the exception of American Sign Language – Mdu Ntr being truly holographic in its essence, also requires the use of both the left and right hemispheres of our brain.

With Mdu Ntr, kinetic energy through holographic hand-to-eye/eye-to-mind coordination causes us to resonate with the superior social, psychological and spiritual consciousness of our Kemetic ancestors. We also directly communicate through the "Mind of God" as images are created by thought-patterns through which ALL things are defined.

Because it is imperative to use Mdu Ntr in our everyday lives to help us re-connect with our heritage, we offer this language in the hope that brothers and sisters in the Diaspora will join us, take our course and soon become proficient in it.

It is my distinct honor and pleasure to share this vital expression of our Kemetic ancestry and culture, with the hope of one day realizing the fullness of a resurgence of Mdu Ntr into the consciousness and lives of children today, and their descendants tomorrow.

See you in class.

Dr. Nalani
